

BLITZ 1510 cod. 15588

Technical specifications

AR Code	15588
Max Pressure (bar)	150
Max Pressure (psi)	2175
Max flow (lph)	600
Max flow (gph)	159
Power (Kw)	26
RPM	1450
Power (Hz)	50
Power (V)	220-240
Unit size (mm) LxWxH	420x310x260
Packaging size	300x500x360
Net weight (Kg)	29
Pallet qty	24
20 feet container qty	264
40 feet container qty	576
Truck qty	792

Product details

The BLITZ 1510 is a cold water pressure washer by Annovi Reverberi, designed for professional use or for expert users who need to perform deep and continuous cleaning tasks over large areas, ensuring excellent performance even on construction sites and in other work environments such as agriculture, animal husbandry, and craftsmanship.

Equipped with the DPA – Dual Pro Appliance System, it allows you to select the Total Stop System mode, which is particularly suitable during regular use of the pressure washer. This mode enables the immediate shutdown of the machine when the trigger gun is released, ensuring lower energy consumption and less wear on the pump and motor. The second available mode is the By-Pass System, recommended for intensive use conditions where the pressure washer is subject to frequent stops and restarts or if used in harsh environmental conditions (e.g., high temperatures, high humidity, environments with low air circulation).

Built with top-quality materials, this Made in Italy pressure washer features a quiet, durable, and reliable induction motor and a pump with three ceramic pistons, a connecting rod-crank system, and a brass head.

The accessories included in the package, which can be connected via a professional brass threaded fitting, are: a 10-meter high-pressure hose, a high-pressure gun with a safety lock and steel core, and an adjustable jet lance. By rotating the nozzle head, you can switch from a more powerful and effective cylindrical jet to a more delicate fan spray. The detergent suction is automatic and occurs through a dedicated tube that connects to an external container.
